

Meeting February 2nd 2016

Review

- We are going through the requirements and design document
- For the requirements document
 - In the would nice to have section
 - Added "Undo function possibly based on history"
 - In V. Use Case Diagrams
 - What is the interface?
 - Added "Database - Interacts with system"
 - Hoping to finish the requirements document by the end of the week
 - "Can we add a section for testability?" - Mack
 - "Sure" - Corey
 - What systems can be tested and what systems cannot be tested?
 - This is something we have to consider more into design
 - Or maybe not! Maybe it will go into requirements
- For the design document
 - Architecture
 - What is your rationale behind 3 tier architecture?
 - MVC?
 - Server-client?
 - Interface data structure
 - flyweight design pattern
 - singleton
 - publish subscribe observer

Here in Attendance:

Corey, Royce, Connor, Michael K., Mack, Angela, Jordan, Bengin, Darwin
