

Meeting - Jan. 7th, 2016

Met up and reviewed the current project proposals,

- Data Linkage
- Systematic Review

Neither seemed interesting, but, probably no on Data Linkage, and strong dislike for Systematic Review.

Reasons:

- Data Linkage:
 - Just didn't look interesting
 - Seemed a bit ambitious.
- Systematic Review:
 - Very English oriented.
 - This could present difficulties.

We are going to wait to see the rest of the project proposals before making any final decisions.

Things to look into:

- Code coverage testing framework
- Logging framework

Decided to use a uniform coding style. Which style is still up for debate.

Risk Management and Inventory personnel:

- James Mckay
- Shane Williamson

Attendance list:

Royce, Michael, Darwin, Connor, Jordan, Angela, James, Mitch, Bengin, Keshan, Mack, Shane.

Cory was sick.

Matthew was out of country.
