

Meeting Minutes

1:00PM - 2:30PM February 17th, 2016

Present

Darvin (notetaker)

Corey

James

Shane

Mac

Conner

Mathew

- Reviewed a bit of the requirements and design document
- Main subject of the meeting involved creating the classes/class diagram
- Reviewed Joint.js and its benefits and its downfalls
 - Benefits: has the basic implementation of our program, makes our lives easier
 - Downfalls: have not yet discovered a way to make it work with google API, not much programming needed
- Consider using JQuery for the user interface (needs to be looked more into)
- Pair programming was mentioned frequently
- Saving/storing done by the google API
- Selenium webdriver (Java) will be used for all of the tests
 - A separate branch will be needed for testing
- Scoring system for requirements created
