

Meeting Jan. 12th 2016

Top two ideas and reasons why we like it:

OJ Shirt Creation Program

- More than half are interested in doing it
- Might make money \$\$\$ (unless Osgood tells us we can't)
- Something we would do in the industry
- Mobile experience
- We will have to ask Osgood about this

Osgood's Pitch (Collaborative Qualitative Modeling Web Application)

- The best learning experience because it's with a professor and teaches software engineering
- Near unanimous agreement.
- He can give us answers if we have questions about the project
- The possible downside is he could intentionally give us not the things we would need
 - This could be seen as an upside as it's a learning experience

The systematic review was a big no for all of us at the meeting.

A possible agriculture project could be proposed in the next meeting.

Space assignment team

- Contact them if they are interested in giving us a proposal

Attendance List

Jordan, Shane, Royce, Michael, Corey, Connor, Bengin, Mack, Darwin, James

New Member

We are getting a new member for our team. Osgood approved of him joining our team and Osgood said that he can join to start working with the team. In our meeting there was no objections to him joining. So I will be adding him to the group but we will know he's permanent on Friday. His name is Michael too (so we'll have two Michaels in the group).

Time elapsed: 60-80 minutes

Absences

Angela - Had class

Mitchell - Had class
